CUSTOMER OBJECTIVES

Back in 2011 this property in Dartmouth was build and rewired by a different contractor. Unfortunately the work involved meant that just five years ago the external lighting needed to undergo a full rewiring exercise to ensure the legal compliance of the installation.

The client was keen to engage with an electrical contractor that was not only competent enough to complete the work to a high standard, but they also needed the contractors to project manage the rewiring project completely.

At a glance

Challenges

- External lighting rewire
- Full project management
- High-quality finish
- Industry qualifications
- Legislative compliant

Benefits

- Full project management
- NIC EIC accredited
- SMAS registered
- TrustMark registered
- ConstructionLine registered
- Quick & professional

SOLUTION

In 2014 we put together the full scope of what would be involved in the project, how long it would take and who would be responsible for each element.

Finish Electrical Ltd carried out the full rewiring of the external lighting including full project management.

They now also have the ongoing maintenance contract for the general maintenance, interior lighting and ventilation system.

"We have been using Finish Electrical for several year now and are incredibly impressed with their work.

Every job they undertake is perfectly planned and well-thought through with the project team taking control of everything.

We are now in a long-term electrical maintenance agreement with them which also includes key-holding.

I have no hesitation in recommending them at all."

MR TYER, LONDON

BENEFITS

Full Project Management

The client was able to relax, confident in the knowledge that Finish Electrical Ltd were capable of delivering a high quality, reliable, professional service.

Fully Insured and Accredited

As an NICEIC approved contractor we are assessed to the highest of standards covering all types of electrical projects and installations.

SMAS Registered

Contractors and clients can benefit from a consistent approach to health and safety, reducing the need for excessive procedures and wasteful costs to the supply chain.

ConstructionLine Registered

By using a ConstructionLine contractor you are using a platform that means you can simplify and speed up the search, validation and purchasing decision process.
